Objective

Seeking full-time position as a cybersecurity engineer starting summer 2027

Education

Iowa State University, Ames, IA

Expected May 2027

Bachelor of Science in Cybersecurity Engineering

GPA: 3.29/4.00

Cybersecurity Experience

Cybersecurity ISEAGE Projects

August 2024 to Present

Cybersecurity Engineering Labs

- Designed and deployed a secure network of Linux-based virtual machines within ISEAGE
- Built virtual servers and desktops to support internal services and simulate threat surface areas
- Conducted penetration testing on internal networks and web applications to identify vulnerabilities

Hacking and Cybersecurity Club Defense Competitions

October 2024 to October 2025

Deterrence and System Management

- Hardened Linux and Windows systems and performed live incident response in a red-team/blue-team style environment
- Collaborated with teammates to maintain service availability and minimize breach attempts

Employment Experience

TwinState Technical Services, Davenport, IA

June 2025 to January 2026

Technology Assistant Intern

- Imaged and provisioned laptops and desktops for seamless end-user setup
- Organized, tracked, and maintained inventory of serviced equipment to support efficient deployment cycles
- Deployed and configured devices at customer sites, resolving setup issues and ensuring a smooth handoff

Certifications

CompTIA Security+ (SY0-701)

August 2026

- Validated skills in network security architecture, threat detection and incident response, identity and access management, cryptography, and governance/risk compliance

Google AI Essentials

June 2026

- Proficiency in generative AI fundamentals and responsible AI use in technical environments.

Leadership

Salt Company

April 2024 to Present

Group Leader

- Lead a small group of 10-15 in weekly devotions while fostering a healthy environment
- Assist in cleaning Jack Trice Stadium after football games and other events
